Netwrix Auditor for Exchange

See what's happening in your on-premises Exchange and Exchange Online

Netwrix Auditor for Exchange **simplifies IT auditing** across on-premises and cloud-based Exchange environments by providing **actionable data** about changes, permissions and non-owner mailbox access events. With its **360-degree visibility**, you can detect **suspicious user behavior** and **policy violations** before they result in costly data breaches, compliance failures or email disruptions.

DETECT AND INVESTIGATE SECURITY THREATS

Get complete visibility into changes, permissions and access events across your on-premises, cloud or hybrid Exchange ecosystem. Quickly detect, investigate and respond to suspicious activity to mitigate the risk of costly data breaches, stiff compliance penalties and lasting damage to your company's reputation.

PROVE COMPLIANCE WITH LESS EFFORT

Saves time and money preparing for compliance audits with out-of-the-box reports for PCI DSS, HIPAA, GDPR and many other compliance regulations. Quickly address ad-hoc questions from auditors using an intuitive search, instead of wasting your valuable time manually combing through native audit logs.
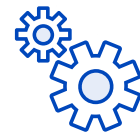

INCREASE THE PRODUCTIVITY OF YOUR IT TEAMS

Slash helpdesk workload and avoid expensive email disruptions by promptly detecting and investigating suspicious activity and quickly remediating any improper changes. Get the actionable intelligence you need to ensure uninterrupted business services without constantly staying late.

CUSTOMER FEEDBACK

"Netwrix Auditor for Exchange does not only gather all the data we need for internal audits, but also enables us to speed up the entire process by taking the usual 2–3 hour timeframe down to 30 minutes."

Cody Lavallee, IT Infrastructure Manager

Powerful Data Security Made Easy

Key Features of Netwrix Auditor for Exchange

VISIBILITY INTO CRITICAL CHANGES

Get the actionable information you need about changes to the most critical elements of your on-prem Exchange and Exchange Online, including the who, what, when and where details and the before and after values.

CONTROL OVER ACCESS PERMISSIONS

See who has access to what in your Exchange Online, how those permissions were granted and whether inheritance is broken. Use this insight to create a more manageable and secure IT infrastructure.

GOOGLE-LIKE INTERACTIVE SEARCH

Sort through the entire audit trail in a few clicks whenever you need to get to the root cause of an operational incident or find out who made an improper modification.

INSIGHT INTO NON-OWNER MAILBOX ACCESS

Track each non-owner access attempt, including who accessed which mailbox, when and from which IP address the access occurred, and what messages or other items were viewed, edited or deleted.

ALERTS ON CRITICAL ACTIVITY

Quickly detect and investigate suspicious activity across your Exchange environment, such as delegating performing unusual actions in the CEO's mailbox, so you can respond before you suffer a data breach.

DETAILED REPORTS AND DASHBOARDS

Get clear information about changes, permissions and user activity on demand, and have any report emailed to you or any other stakeholder automatically on schedule.

HOW IS NETWRIX AUDITOR FOR EXCHANGE DIFFERENT?

CLOUD FRIENDLY

Supports both on-premises Exchange and Exchange Online, so you can easily monitor your on-prem, cloud or hybrid IT environments.

NON-INTRUSIVE ARCHITECTURE

Collects audit data without the use of any intrusive services, so it never degrades system performance.

TWO-TIERED DATA STORAGE

Stores your entire audit trail for over 10 years in a cost-effective two-tiered storage and provides easy access to it throughout the whole retention period.

RESTFUL API

Integrates with other IT tools, so you can easily expand visibility to other systems and have your entire audit trail available from a single place.
