

Netwrix Auditor for SharePoint

See what's going on in your on-premises SharePoint and SharePoint Online

Netwrix Auditor for SharePoint **makes it easy** to perform IT auditing across your SharePoint Online and on-premises SharePoint by providing **complete visibility** into changes, document reads and access permissions. With this **actionable intelligence**, you can quickly detect suspicious user behavior and investigate incidents before they result in data leaks, compliance failures or downtime.

DETECT AND INVESTIGATE SECURITY THREATS

Get complete visibility into changes, document reads and access permissions across your on-premises and cloud-based SharePoint environments. This deep insight enables you to detect and respond to security incidents quickly, so your company doesn't become the next data breach headline.

PROVE COMPLIANCE WITH LESS EFFORT

Slash the time needed to prepare for audits by up to 85% with out-of-the-box reports for PCI DSS, HIPAA, GDPR and many other compliance regulations. Quickly address ad-hoc questions from auditors with an intuitive search function, instead spending hours or days combing through noisy and cryptic audit logs.

INCREASE THE PRODUCTIVITY OF YOUR IT TEAMS

Quickly uncover, investigate and remediate critical changes, such as improper modifications of farm configuration or permissions, before they cause downtime. Have reports sent automatically to stakeholders on schedule — and reclaim all the time you used to have to spend manually compiling data on demand.

CUSTOMER FEEDBACK

"We went from spending days figuring out what is wrong to detecting the issue in a couple of minutes. Thanks to Netwrix Auditor, now we are more comfortable with moving sensitive data from our file servers to SharePoint Online, which will contribute to our productivity and save storage."

James Mountain, Director of Information Security

Key Features of Netwrix Auditor for SharePoint

DATA CLASSIFICATION REPORTS

Reduce the risk of data breaches by finding sensitive data and ensuring it resides only in dedicated safe locations with proper access controls. These reports work only in conjunction with Netwrix Data Classification.

VISIBILITY INTO CRITICAL CHANGES

Get all the key information about changes to the most critical elements of your on-premises SharePoint and SharePoint Online, including the who, what, when and where details and the before and after values.

EASY MONITORING OF READ ACCESS

Keep tabs on who viewed what documents and lists in your on-prem and cloud-based SharePoint and when each event occurred, so you can make sure that no one is viewing files they shouldn't have access to.

CONTROL OVER ACCESS PERMISSIONS

Know exactly who has access to what, how those permissions were granted and whether inheritance is broken. Use this insight to create a more manageable and secure IT ecosystem.

ALERTS ON CRITICAL ACTIVITY

Be proactively notified about threats to your SharePoint Online and on-prem SharePoint environments, so you can investigate and respond before you suffer downtime or a data breach.

GOOGLE-LIKE INTERACTIVE SEARCH

Sort through your entire audit trail in just a few clicks whenever you need to get to the root cause of an operational incident or find out who made an unauthorized modification.

HOW IS NETWRIX AUDITOR FOR SHAREPOINT DIFFERENT?

CLOUD FRIENDLY

Supports both on-premises SharePoint and SharePoint Online, so you can easily monitor your on-prem, cloud or hybrid IT environment.

NON-INTRUSIVE ARCHITECTURE

Collects audit data without the use of any intrusive services, so it doesn't degrade your system performance.

TWO-TIERED DATA STORAGE

Stores your entire audit trail for over 10 years in a cost-effective two-tiered storage and provides easy access to it throughout the whole retention period.

RESTFUL API

Integrates with other IT tools so you can easily expand visibility to other systems and have your entire audit trail available from a single place.
