

Netwrix Enterprise Auditor (formerly StealthAUDIT)

Secure sensitive data and reduce the risk of a data breach

Minimize your attack surface by discovering sensitive information and keeping access to it at the least-privilege level, and prove your success to auditors with ease.

REDUCE THE RISK OF DATA BREACHES

Mitigate the risks around your sensitive data by reducing access to the minimum and keeping it under control going forward.

ACHIEVE AND PROVE COMPLIANCE

Know where your regulated data is stored and who has access to it, and prove to auditors the strength of your data access policies.

EMPOWER BUSINESS USERS AND FREE UP IT TEAMS

Enable users to request the access they need directly from the data owners, lifting the burden of access management from IT teams.

CUSTOMER FEEDBACK

“Great product and excellent service. It has been a great asset to compliance, audit and cybersecurity. We are now able to shift the load of fileshare access reviews from a tech to the owner, which saves a lot of time.”

Key Features of Netwrix Enterprise Auditor

HOW NETWRIX ENTERPRISE AUDITOR IS DIFFERENT?

IDENTIFY SENSITIVE DATA

Focus your security efforts by discovering sensitive and regulated data, whether structured or unstructured, both on premises and in the cloud, and enabling data owners to verify data sensitivity.

PINPOINT RISKS AROUND YOUR DATA

Spot sensitive information that is accessible to more people than needed, unusual access events, disabled users with access to critical records, and other conditions that could lead to a breach.

AUTOMATE THREAT REMEDIATION

Reduce IT workload by automatically fixing conditions that put valuable data at risk: revoking excessive permissions to data or Exchange mailboxes, disabling users, modifying group membership, and much more.

DELEGATE ACCESS MANAGEMENT

Alleviate the IT burden of managing access in keeping with least privilege by enabling business users to make access requests and data owners to approve or deny them, as well as to regularly review permissions to their data.

PROVIDE REPORTS FOR AUDITORS

Prove to external and internal auditors the strength of your access controls around sensitive data wherever it resides with easy-to-digest reports.

ADHERE TO PRIVACY REQUIREMENTS

Take control of the personal information you store and satisfy data subject access requests (DSARs) with complete visibility into the data you possess on any individual.

SCALABLE

Its lightweight architecture scales to meet the needs of the world's largest and most complex infrastructures.

FLEXIBLE

It's a turnkey solution for common needs, but is highly configurable to give users the flexibility to fulfill their unique requirements.

INTEGRATED

Interoperability with your current systems and processes maximizes the value of your existing investments.
