Netwrix Privilege Secure for Discovery

(formerly Remediant SecureONE)

Enhance security by discovering and removing privilege account sprawl

Netwrix Privilege Secure for Discovery enables IT administrators and security analysts to have dynamic and continuous visibility into their organization's privileged accounts and manage them with a single click. Users then self-administer privilege access, getting access to only the right resource, at the right moment and for the length of time they need to complete their job. This approach eliminates standing privileges, effectively preventing lateral movement attacks, and significantly reducing an organization's attack surface.

INCIDENT RESPONSE: GO BEYOND MANAGEMENT

The credential has become a commodity that will be breached. 74% of breached organizations admitted the breach involved access to a privileged account. In addition, once a credential is compromised, traditional privileged access management solutions are rendered useless.

CONTINUOUS, DEMONSTRABLE COMPLIANCE

Through continuous scanning of privileged accounts, Privilege Secure for Discovery automatically ensures enterprise-wide compliance and acts as a single source of truth for reporting the distribution of privileged access and the associated risk posture.

PRIVILEGE SECURE FOR DISCOVERY FOR ANY VERTICAL

Regardless of whether you are government, healthcare, financial services or manufacturing etc., the solution works to continuously discover privileged account sprawl and enable operational access while removing common attack surfaces.

CUSTOMER FEEDBACK

"It is rare to find a simple solution that **simultaneously improves compliance, operations, and security.** Granting full administrator rights, just-in-time, to individual systems, improves administrator support coverage while drastically limiting lateral movement risk."

Chad Anderson, Cyber Mitigations Architect, Lockheed Martin

Key Features of Netwrix Privilege Secure for Discovery

HOW IS NETWRIX PRIVILEGE SECURE FOR DISCOVERY DIFFERENT?

ZERO STANDING PRIVILEGE FOR ALL ENDPOINTS

Single click removal of undetected and unnecessary administrative accounts from all endpoints, effectively eliminating privilege sprawl by removing 24x7 admin access and reducing privileged identity attack surface to zero.

JUST-IN-TIME ACCESS

Privileged users are granted Just-in-Time Access to specific endpoints that require administration in real-time, for only the amount of time needed to complete their task, after which access is de-commissioned or the administrator indicates access can be terminated.

INTELLIGENT SESSION CAPTURE

Identify privileged accounts, access end-user session data through EDR vendors and provide context & alerts on nefarious privileged session activities such as malware download and accessing command & control sites.

MULTI-FACTOR AUTHORIZATION

Privilege Secure for Discovery is a single control point for endpoint just-in-time access, making it simple and straightforward to power the adoption of MFA (Multi-Factor Authentication).

LOW FRICTION ADMIN EXPERIENCE

Administrative experience using the admin's own account removes the burden of navigating traditional complicated access control interfaces.

ATTACK SURFACE VISIBILITY

Visualize, analyze, and manage your attack surface with Privileged Access Risk executive and practitioner dashboards.

SCALABILITY

Netwrix Privilege Secure for Discovery scales to meet the needs of the largest and most complex infrastructures.

LIGHTWEIGHT FOOTPRINT

Netwrix Privilege Secure for Discovery uses agentless technology, resulting in negligible impact on system load.

LOW COST OF OWNERSHIP

No additional hardware, software or professional services are required to deploy and maintain the solution.

FAST TIME TO VALUE

Scan thousands of hosts in minutes. Start seeing the benefits of just-in-time access in days and weeks, not years.
